DI PADOVA

Dear Colleagues,

It is my pleasure to welcome at the 16th Congress of the European Association of Clinical Anatomy (EACA) held jointly with the XII Meeting of the International Symposium of Clinical and Applied Anatomy (ISCAA) from 14 to 16th September 2021. EACA and ISCAA congresses are successful events that periodically permit to all the students, teachers and researchers interested in Clinical Anatomy to meet and to exchange information.

Year after year, EACA meeting has become a dynamic forum for anatomy professors from all over the world and students to share their knowledge, and we are very honored to host the 16° EACA meeting jointly with the XII ISCAA meeting in Padova in 2021.

We would have been delighted to have you in presence in Padua but unfortunately this was not possible. The COVID19 pandemic was a real disaster which changed our life. In order to limit the risks of participants moving from many different countries, we decided to conduct remotely this meeting. However, we would like to transmit to all of you our feelings and warm welcome of our University.

The congress is planned to be held in 3 days, during which you can attend 3 Guest Lectures, 11 Sessions of Oral Communication, 5 symposia and 9 Sessions of e-posters. The main topics will be clinical anatomy, neuroanatomy and education. As usual, a large part of the meeting will provide opportunities for delegates to update colleagues of developments in all the traditional topics of clinical anatomy and of the technological innovations that are more relevant for anatomy education.

We have received more than 230 abstract submissions from all over the world and we are very happy to this large active participation from prestigious Anatomical Schools.

It will certainly be a great cultural and scientific event and a further opportunity to discuss issues of mutual interest with many colleagues.

Professor Raffaele De Caro
President of 16th Congress of EACA
held jointly with XII Meeting of ISCAA
