

06.04.01 Biology

Mode of Attendance: Full-time

Length of course: 2 years

Language: Russian/English

Our mission is to train world-class researchers capable of translating fundamental biological discoveries into modern clinical practice, identifying molecular markers of human pathologies, studying the mechanisms of their manifestations and developing targeted ways of exposure. Sechenov University has created unique conditions for Master's degree training in Biology in close connection with the university's clinical centres and under the guidance of leading scientists in the field of molecular and translational medicine. Graduates of the Master's Programme receive qualifications which are in demand both in Russian and foreign research centers, as well as in applied medicine.
