

09.04.02 Information Systems and Technologies

Mode of Attendance: Full-time

Length of course: 2 years

Language: Russian/English

The educational Master's programme focuses on the training of graduate students in the field of design, developing tasks for healthcare workers, providing methodological guidelines for the education sector, and developing innovative ideas.

It is a practice-oriented training aimed at forming professional skills in the field of medical management and scientific and educational activities.

Academic Staff: doctors and candidates of sciences, academicians of the Russian Academy of Sciences, leading specialists of the Information Systems and Technologies.

Features: we apply the latest technologies and teaching methods (interactive lectures, group projects, individual and group presentations, research seminars), and provide an opportunity to study courses of interest from a wide range of disciplines.

Potential and actual business partners:

- State and municipal healthcare organisations;
- Health insurance companies;
- Medical and pharmaceutical organisations of any kind;
- Research organisations related to information technologies

Graduates of the programme can pursue a career in hospitals and clinics, managing information departments, informatisation services at hospitals, and health information and analysis centres. They can apply for jobs at the Department of Informatisation of Russia's Ministry of Health, as well as the health insurance fund, pension fund, social insurance fund, Roszdravnadzor, Rospotrebnadzor, and the telemedicine centres.
